## Appendix 1

Generally SIM adapters use a fake code 001 instead of your country code

So you need to edit a file (for Expert only):

/System/Library/Frameworks/UIKit.framework/PhoneFormats/UIFontMobileCountryCodes.plist

You must add an entry to simulate that SIM is of your country:

<key>001</key>

<string>xx</string>

with instead of xx the identifier of your country (see previous list)

Argentina = ar , Ecuador = ec ....

Otherwise there is an application in CYDIA , in TWEAKS section , named "Net.-Local Number Format" , who tell to the phone to use the international prefix of the ACTUAL Country/Network instead of SIM or regional settings.
